Standard & Custom Reusable
Shipping Cases

When it's gotta get there. And gotta get back.

WILSON CASE INC.
Manufacturer of Reusable Shipping Cases Since 1976

1.800.322.5493

Wilson LT™: Lighter. Tougher. And saves money every time you ship.

Wilson Case: Protecting your investment—time after time.

When you ship equipment, you cannot predict the perils that await. When you ship equipment in a Wilson case, you can predict that your equipment will arrive safely.

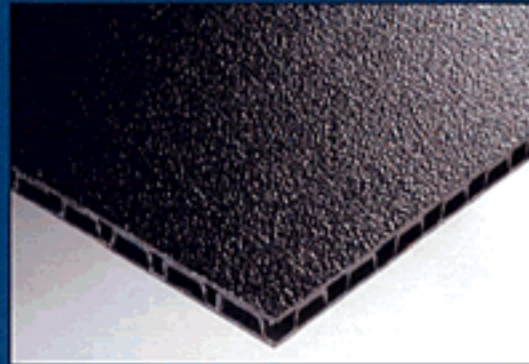

At Wilson Case, everything we do is focused on you—protecting your equipment, custom engineering a case specifically for your purpose, making the most of your budget, and ensuring that you get customer service that exceeds your expectations.

It all adds up to confidence that you and your equipment are being protected at every step.

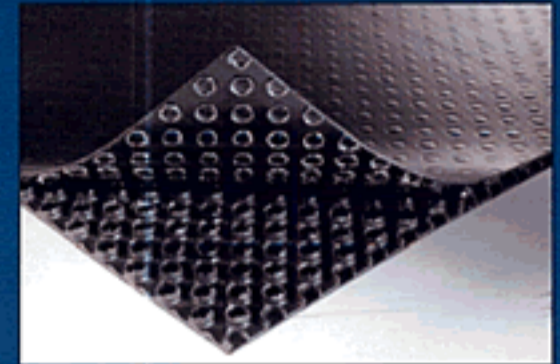

At Wilson Case, we deliver that confidence every day.

Up to 45%
lighter than conventional
ABS-clad plywood.

Wilson LT™ is a tri-laminate reinforced polypropylene material that helps reduce shipping costs without sacrificing the safety and security of your equipment.

Unique non-directional cellular center of Wilson LT™ provides a powerful combination of strength and lighter weight.

Wilson LT™ is a special polypropylene-based material that is revolutionizing the way equipment is protected during shipment.

Shipping cases constructed of Wilson LT™ offer a wide range of benefits that are definitely not kids' stuff:

- Up to 45% lighter than cases made with ABS-clad plywood
- Significantly reduces shipping costs—every time you ship
- Non-directional construction for super strength and protection
- Moisture resistant
- UV tolerant
- Chemically inert—safe for virtually any equipment
- Easier to handle and lift
- Recyclable

Ask for a quote on your Wilson case using Wilson LT™. You'll soon discover that when it comes to saving you money every time you ship, we're not kidding around!

The TagAlong™: Pulling your weight has never been easier!

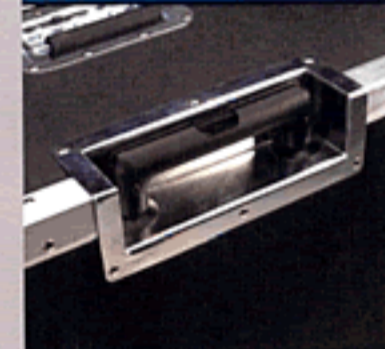

Now you can hustle through the airport with an equipment case just as easily as you can with your overnight bag. The Wilson Case TagAlong is engineered to take the rugged handling of airline baggage personnel—while remaining easy to wheel through a crowded trade show arena.

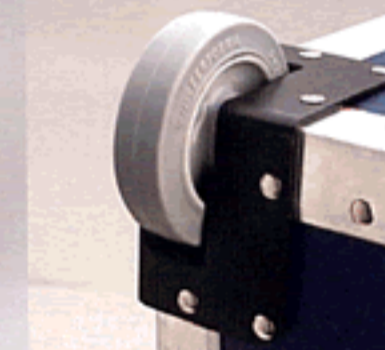

- Strong pull-out handle locks in place when extended—and is recessed when in the down position to protect it during transit.
- Sensible wheel placement on the outside edges of the case improves stability when you turn a corner. **You can even replace them yourself!**
- Available in any case style—hinged lid, removable lid, etc. You choose!

Fully adjustable pull-out handle.

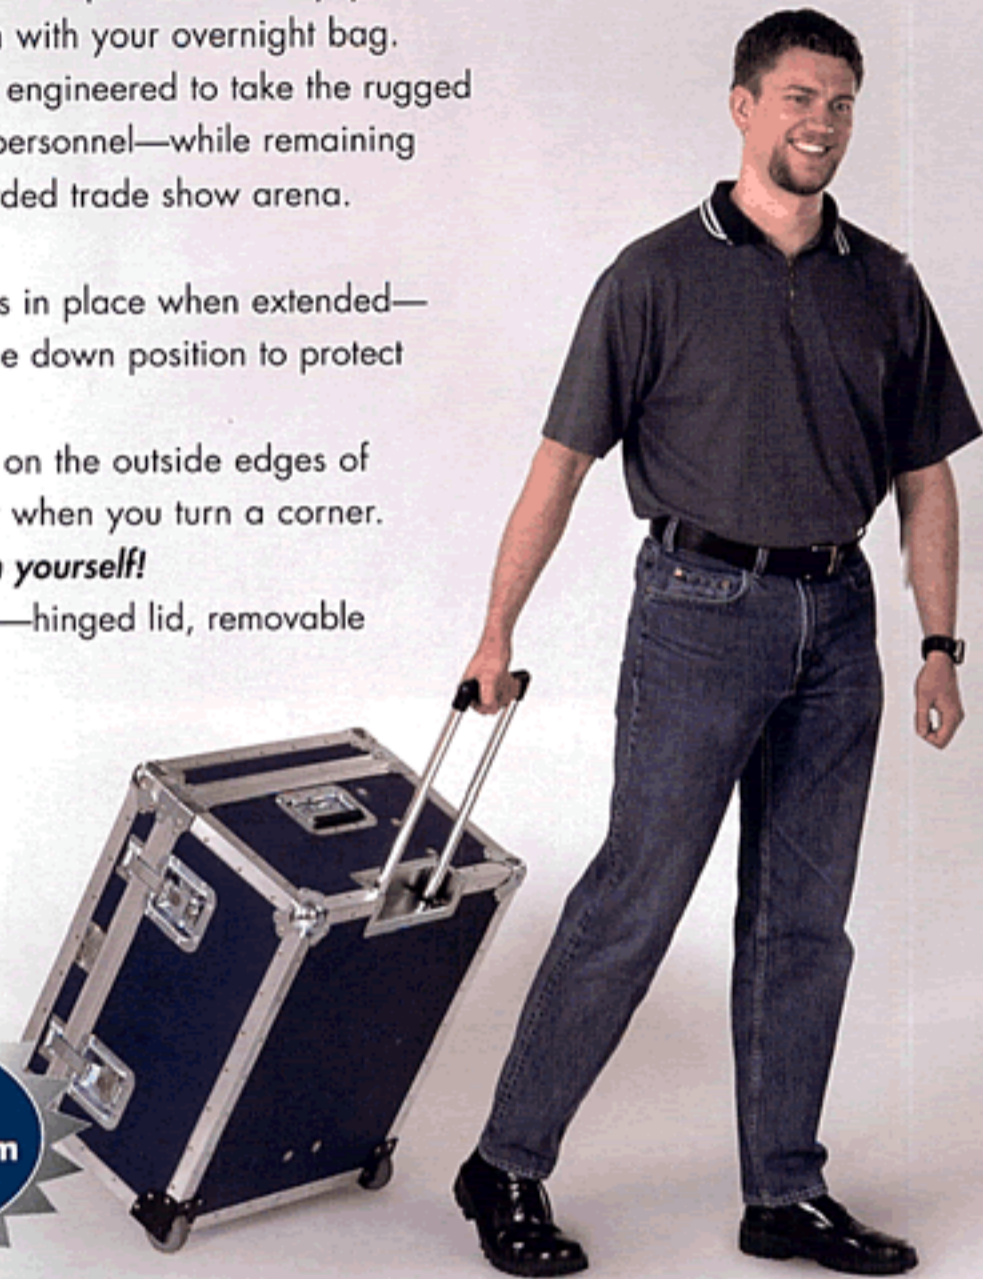

Handle locks into place when not in use.

Durable, smooth-rolling recessed wheels for mobility.

DuraLite™ Carrying Cases from Wilson Case

DuraLite cases from Wilson Case combine super-tough DuraLite™ panels with rugged hardware to give you reliable protection—that's up to 30% lighter than standard cases. Every DuraLite case carries Wilson's limited lifetime warranty. DuraLite cases are ideal for light transit use such as sales demos, data storage or day-to-day business. For more heavy-duty applications, look to our Wilson LT™ cases.

DuraLite from Wilson Case is the perfect choice when you want protection with minimum weight—like this briefcase.

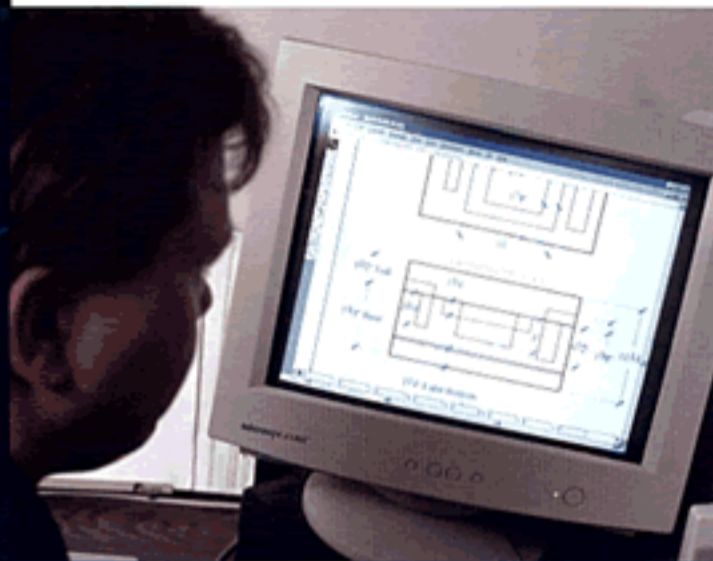

Surface mounted hardware is recommended for carrying cases and in-house use.

With Wilson, you're not limited to stock cases.

Year after year—case after case—Wilson Case has demonstrated an uncanny ability to fit the most gear into the minimum practical space—while still providing unmatched protection. Challenge us with your next case order—and you'll soon discover that Wilson Case delivers on every count.

- **Expert custom design** by experienced engineers who understand the physics and practical applications of transporting equipment of all types
- **FREE quotes** accompanied with a CAD drawing of your custom case—so you know not only what your case will cost, but what it will look like!

Powermate

A Wilson Case original—providing the ultimate in organization, customization, flexibility, protection and ease of transport. Pull-out handle and wheels make it easy to roll anywhere! We'll help you design a Powermate that does what you want it to do.

Here are some innovative ways we've met challenges

Plasma Screen Case

Trust Wilson Case when you ship or transport sensitive, expensive audio-visual equipment.

Rackmount/Shockmount

E.I.A. Rackmount systems use rugged rails, pre-tapped for quick assembly or adjustment. Shockmount cases add thick, high density foam and a protective inner wall for fragile contents. Many optional accessories are available.

Flatscreen Case

Wilson cases protect monitors, medical equipment and other electronics traveling around the world.

Ramp Case

Loading and unloading equipment is so easy, it rolls in and out.

Options from Wilson Case make your case truly yours.

It starts with a smartly-engineered, ruggedly-constructed Wilson case. But it's the options that make your Wilson case do what you want it to do. We're always adding, always innovating—so if you don't see it here, call us and we'll either design it or find it for you!

Security Choose from recessed combination lock, keyed lock, or recessed padlock hasp.

Mobility Heavy-duty casters are matched to your case and conditions to assure long-lasting performance.

—just to your imagination!

- **Quick-Ship** option means your custom case ships in five business days or less.
- **Unmatched customer service** from professionals who work with you to engineer the case that best meets your requirements, your budget and your timeline.
- **Limited lifetime warranty** on all cases.

Double Upright
Everything in its place—right within reach. Choose any combination of drawers, compartments and pigeonholes.

ges for our customers.

ing heavy
—it just

Tradeshow Trunk
Everything you need for your booth in one rugged Wilson case.

Clamshell
Provides easy access to large heavy equipment.

Clamp-On Lid
Heavy-duty butterfly hardware keeps equipment secure in transit and allows the lid to be removed from the case for easy access.

Pull Off Cover
Why lift heavy gear out of a deep case? Get quick, easy handling with the pull off cover.

Get custom cases in 5 business days or less with our Quick-Ship option!

Imprinting Send us your artwork and we'll add it to your Wilson case with a screen print or stencil.

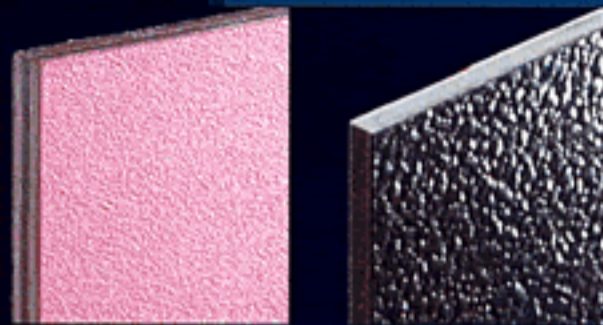

Organization Trays, drawers, compartments and cubbyholes turn your Wilson case into the ultimate organizer.

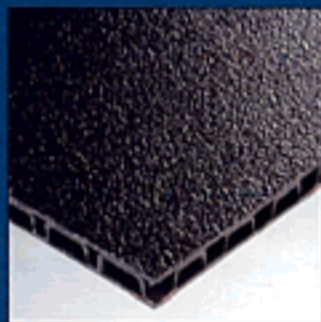

Table Legs Why let the case lid just lie there when you can use it for workspace?

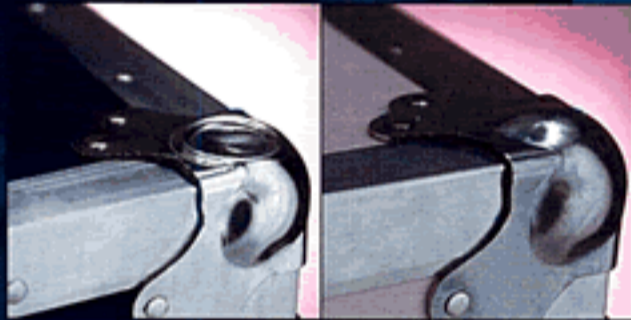

The makings of a great Wilson case.

1
Construction Panels Standard ABS cases: Protective covering of .040" high-impact industrial grade ABS pressure-laminated to 1/4", 3/8" or 1/2" solid-core #1 grade plywood (left). For the ultimate in impact resistance choose an aluminum skin (right).

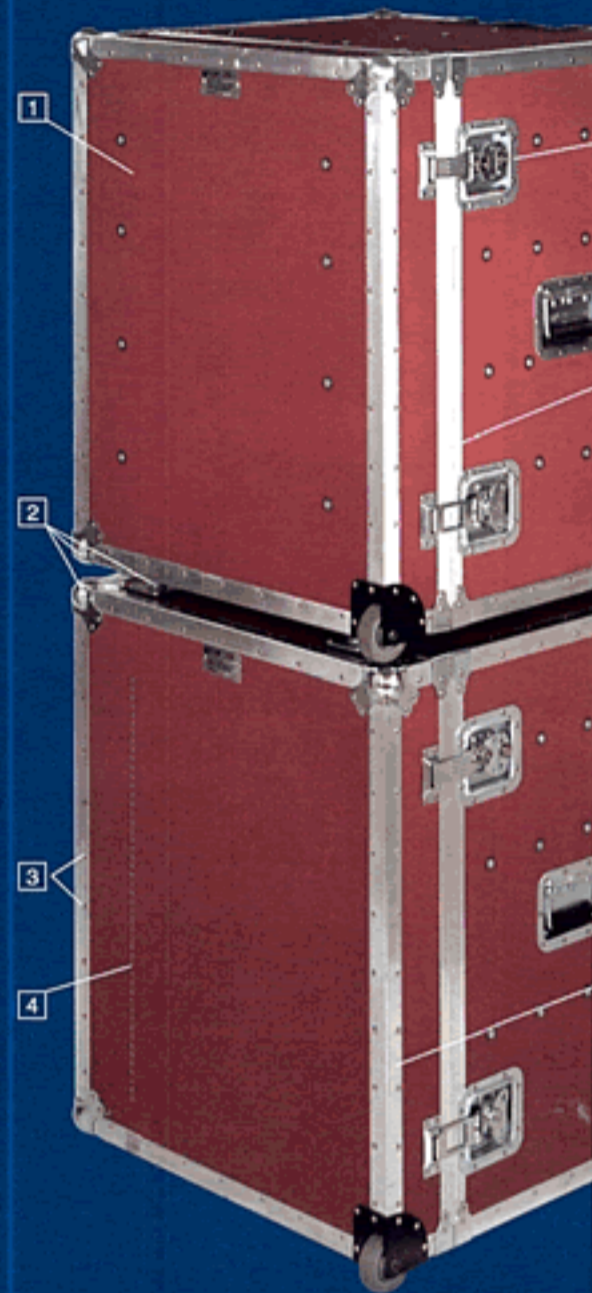

Wilson LT™: Tri-laminate, non-directional polypropylene panel.

2
Corners: 14-gauge plated steel, protective ball corners and male/female plates, nest together for easy stacking.

3
Rivets: Plated steel rivets spaced at 3 inches maximum and machine-driven for unsurpassed holding power.

Questions we hear a lot—and the answers.

Do you have a case for (fill in the blank)?

Whatever you need to ship, Wilson Case has a case for it. We'll provide FREE expert design to create a case specifically to ensure the protection of your equipment. We also have a complete line of stock sizes for the most common items being shipped today.

What will it cost?

Custom design services are FREE. Prices vary for custom cases since the case is built to your specific needs. Once we understand your case requirements, we provide a quote complete with drawings of your case. You can find prices for our stock cases in our website's on-line store at www.wilsoncase.com.

How long will it take to get my Wilson case?

Stock cases ship in one to two business days. It normally takes 10 to 14 business days to build and ship a custom case. However, we offer

a "quick ship" option that ensures shipment within five business days or less. It all comes down to when you need your case—and we'll work with you to make it happen.

What case options are available?

You name it: we have dozens of options for mobility, security, labeling, and organizing—casters, locks, stacking corners, label plates, stencils, drawers, bins, straps, lifts, vents, doors...

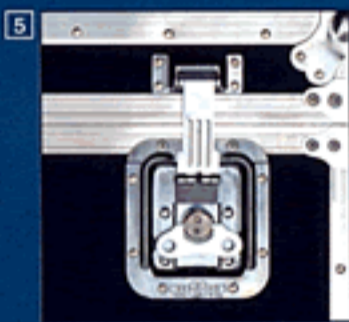

GSA Contract Holder

FSC Group 81, Part 1, Section B FSC Class 8115 Contract Number GS-14F-0724G
Mil. Spec Wilson's ATA-300 cases are adaptable to meet Mil. Spec. 810, C-4105J and 28800 requirements.

Foam: Packaging grade closed-cell and open-cell foam engineered for optimum protection.

Hinged Lid: Stainless steel continuous piano hinge will not rust or corrode. Riveted through double walled valance every two inches.

Latches: Recessed plated steel; positive action butterfly twist style. Does not require valance to be broken. Hook spans tongue-and-groove to resist dust and moisture.

Valance: Exceptionally deep tongue-and-groove closure; extruded aluminum 6063 alloy; heat treated to T-5. Available with neoprene gasket to seal out moisture.

Handles: Standard recessed handles; cushioned for comfort and spring-loaded to stay put during transit.

Angle: Extruded aluminum; 6063 alloy; heat-treated to T-6; sized to case sidewall.

Here are some questions we'll ask you:

Engineering the right Wilson case requires the right information. So we'll help you by asking the right questions. But don't be anxious—we can help you sort through the options and details to ensure that the Wilson case you receive does the job for years and years.

Mobility

- Will you need casters? Heavy duty or standard? What kind of terrain will the case be wheeled across?

- Will you want to pull the case behind you like luggage?
- Are there size restrictions? Does your case need to fit through a standard door?
- How will the case be transported—car, truck, airplane, van, bus?

Utility

- What will be transported in the case? Are there accessories that need to be included?

- Will you want to operate the equipment while it's in the case?
- What style will best fit your application: Hinged or removable lid? Removable front or back? Workstation? Shockmount? Rack-mount? With rear rails or without?

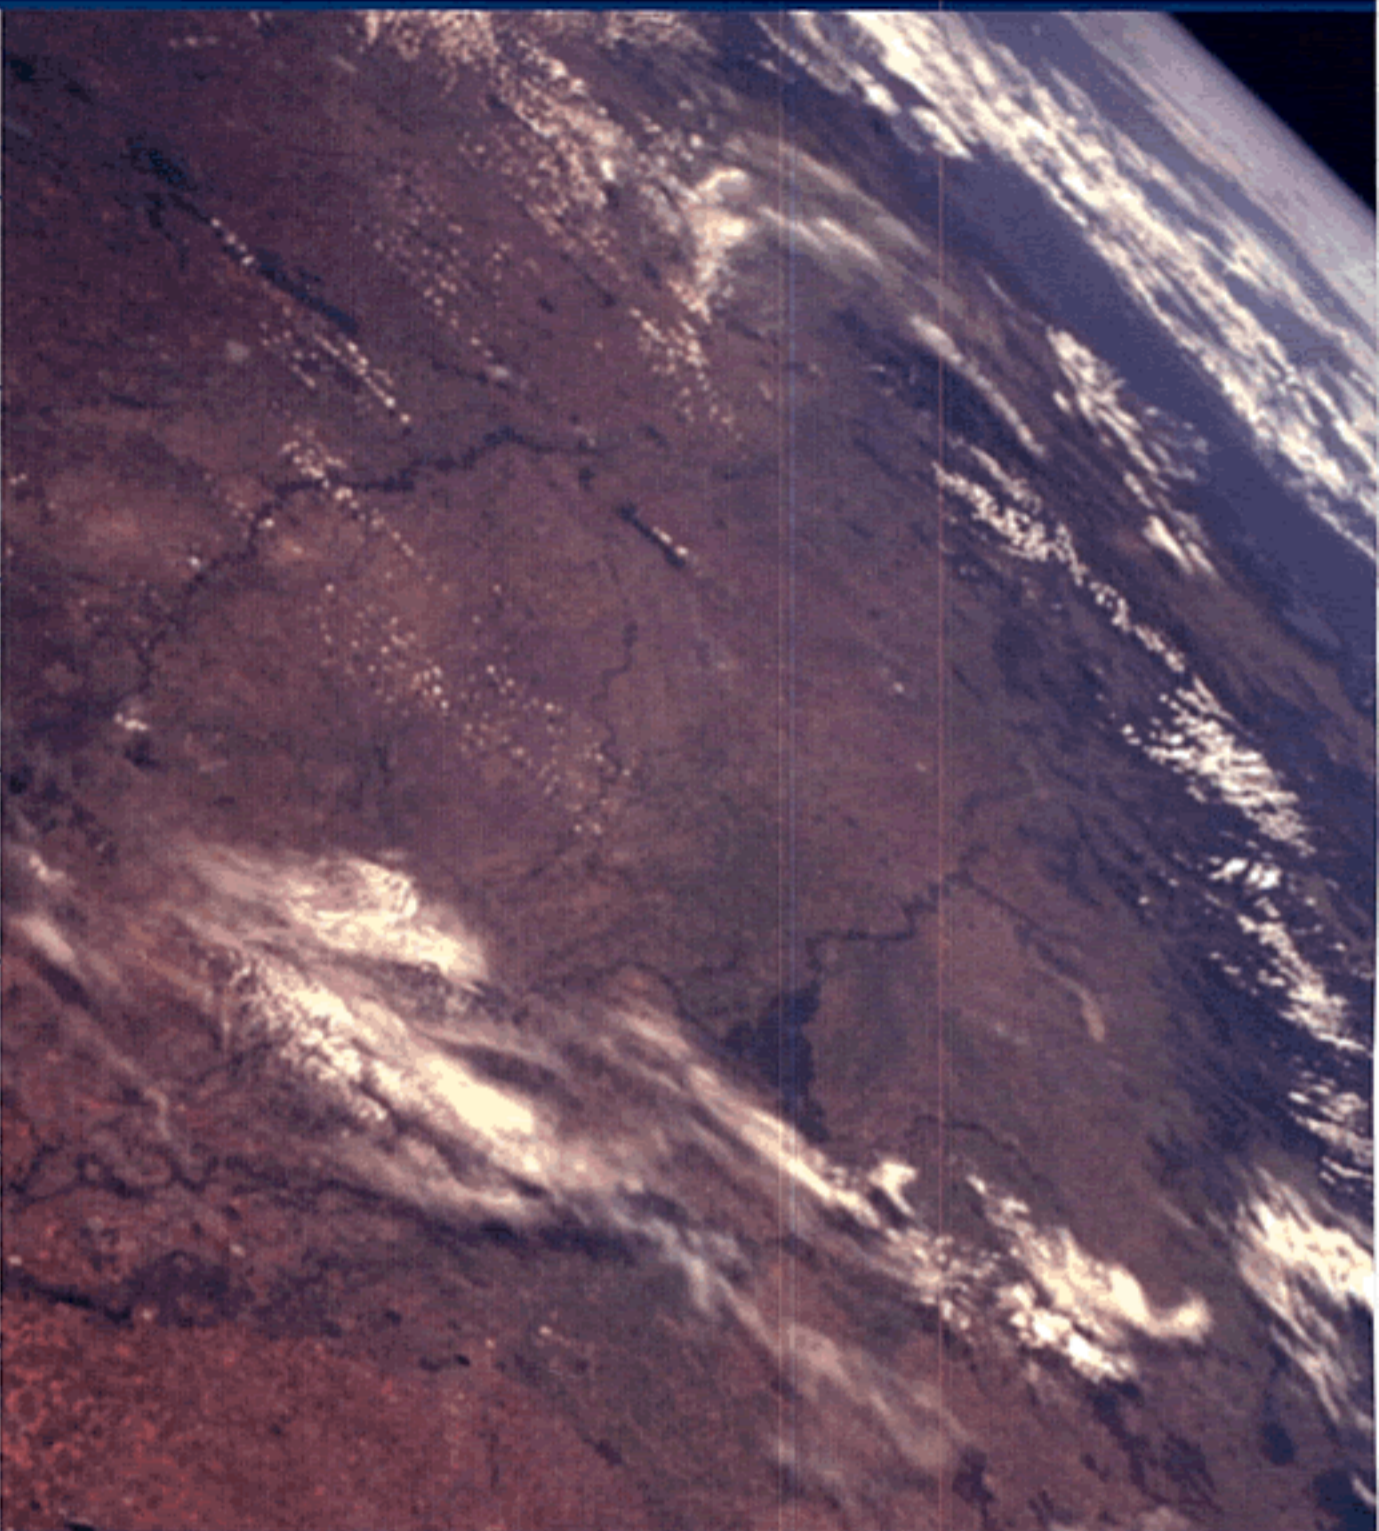

Security

- Do you need locks?
- Key lock? Padlock hasp? Combination lock?

Wilson Case has engineered cases for:

- Entertainment
- Rocket engines
- Fuel line assemblies
- Airplane windshields
- Literature racks
- Athletics
- Plasma screen monitors
- Stage/theatre lighting
- Exhibits
- Medical equipment
