ABOUT THE LAND TAMER® II

The new Land Tamer® II RAV is built for extreme off road use and is more capable than any recreational ATV. The Land Tamer® RAV was designed to travel where other ATVs simply cannot go, such as deep water, mud and snow.

The Land Tamer® is 4 vehicles in 1. It's an ATV, a boat, a snowcoach and a tractor with year around versatility. The Land Tamer® is one machine that can do it all without the cost, maintenance and storage requirements of 4 other vehicles. The Land Tamer® is a wise investment choice over single use vehicles due to it's multi-use capabilities. The Land Tamer® is a common sense approach for anyone who needs maximum versatility, performance and efficiency.

MAJOR ADVANTAGES!

- Fully Amphibious, Yes it Floats!
- 6x6 or 8x8 All Wheel Drive!
- All Season Versatility!
- Stability and Safety!
- High Horsepower and Torque!
- Large Cargo Capacities!
- Easy, Low Cost Maintenance!
- Many Optional Accessories!
- Environmentally Friendly!

VERSATILITY!

Versatility is Land Tamer®'s middle name. With the proper optional accessories, such as our Snow Track Option, it can be set up as a snowcoach, for winter operation, complete with a fully enclosed heated ROPS certified cab that can seat up to 9 people on our 8x8 model.

SAFETY AND COMFORT!

With our optional Water Propulsion System, the Land Tamer® can travel in deep water faster than any other amphibious ATV. This makes it the only ATV that can cross moving rivers or larger bodies of water with safety.

Used as a tractor, with our optional 3 point hitch and PTO system, the Land Tamer® can mow or spray those swamps while minimizing environmental damage to the terrain.

For recreational use, the Land Tamer® is the hunters ultimate dream machine. It can be set up as a floating blind, complete with custom camo colors, jet propulsion and track system. It is the only vehicle built for versatility, reliability and safety for extreme, all weather, off road use. For more information visit www.landtamer.com.
