# HEALTH PHYSICS SERVICES

ERS Solutions, Inc is a woman-owned small business that provides a client-driven approach. At ERS Solutions, Inc., we work diligently with our clients to identify needs, evaluate options, and recommend a proper course of action and assist in implementation. Our cradle-to-grave project management skills provide our clients with a custom-fit solution to handling your large projects.

## Emergency Response

At ERS Solutions, Inc. our personnel have extensive experience in emergency response actions for accidents involving radioactive materials. We specialize in the full response cycle; planning and preparation, prevention, and response actions. Support activities include the development of emergency response plans and implementing procedures consistent with current regulatory guidance as well as the testing of plans and procedures through the development and conduct of emergency preparedness drills and exercises.

## Radiological Training

ERS Solutions, Inc. has been providing training in all aspects of radiation safety for the past 10 years. Our trainers will customize training classes to the specific needs of our clients.

Our training classes include:

- ? *Radiation Safety Officer*
- ? *Radiation Safety Officer Refresher*
- ? *Emergency Response*
- ? *Instrumentation*
- ? *Transportation of Radioactive Material*

All training programs are specifically tailored to the client's application and/or radioactive/hazardous material of concern. Our philosophy is to provide practical exercise that enhance the classroom lectures. Classes provided at the client's facilities provide an excellent learning environment and "real life" training practice.

## Decommissioning

Our health physicists provide a variety of decommissioning and decontamination related services. The scope of our projects have ranged from simple phase outs of small production areas or formerly utilized equipment to complete release of large broad scope

manufacturing facilities encompassing thousands of square feet of contaminated area. ERS personnel have presided over more than 40 MARSSIM and CERCLA closures designing, performing, analyzing, and documenting the surveys. Our knowledge and experience in the use of MARSSIM allows us to utilize the flexibility inherent in the guidance to it maximum saving the client time and money while ensuring acceptance by the regulatory agency.

## Compliance Inspections

ERS Solutions, Inc. provides independent and confidential regulatory inspection of our client's facilities. Our goal is to identify potential areas of non-compliance, recommend any necessary changes to ensure regulatory compliance, and work with our clients to implement corrective actions. ERS personnel have extensive experience in performing inspections for the NRC, DOD, and private industry.
