California, Maryland 20619 USA  
Phone: 240.725.0638  
Fax: 301.862.5315

### Incorporation

Delaware - 2002

### Vision

CryptoLex is a global innovator enabling positive societal change through authentication assurance technology designed to protect people's identity and secure global communications and transactions.

### Mission

We provide cutting-edge portable biometric products, services and solutions to enable secure identity verification, identity management and identity sharing over open and closed channels for virtual and physical access.

### Technology

CryptoLex Inc. is a leading provider of authentication assurance technologies for government, military and financial institutions. Combining the security of cryptography with the power of portable biometrics, CryptoLex has developed The Power of One™ Solution - one powerful authentication solution that seamlessly integrates into existing legacy systems, unifies disparate networks, and is easily customizable for any single application. The Power of One provides unified secure authentication for both virtual and physical access. The Power of One Solution has the ability to block systematic fraud and dramatically change the way global business is conducted. CryptoLex technology has the potential to become the foundation for user authentication for network systems and applications worldwide. Enabling The Power of One is Mobio® - a miniature hand-held device the size of a key fob. Mobio facilitates authentication of individuals to all systems including ATMs, VPNs and the Internet. Mobio operates wirelessly over open and closed channels through computers, PDAs and cell phones. Mobio securely enables communications and transactions from anywhere, at anytime.

### Business Markets

Gaming

### Products

At the core of the CryptoLex Power of One Authentication Assurance Solution is Mobio - the world's first three-factor mobile authentication device. Using a patent-pending combination of portable biometrics and cryptography, Mobio delivers what business and governments need – one device that provides powerful unified authentication across multiple sites and systems. One device that can only be used by one person. One device that is uniquely tied to its owner. One device that can't be stolen or tampered with. One device that securely replaces passwords and PINs.

This portable biometric authentication product makes system integration possible and is designed to overcome all barriers to operational advancement in government, military or corporate environments. Mobio operates wherever passwords, smartcards, tokens, or Public Key Infrastructure (PKI) are currently employed. Mobio creates a chain of trust between individuals and organizations safeguarding user identity while ensuring user accountability. Mobio means *you*, and can be proven in a court of law.

## **Sales/Distribution**

CryptoLex markets its products through a direct sales force, systems integrators and strategic licensing. The direct sales force has a broad experience in large account selling in government and large institutions. Each sales member sells the Power of One solution into strategic accounts often partnering with large integrators to assist with deployment. The sales force may also cultivate relationships with its customer's technology suppliers thereby creating key licensing opportunities for Mobio and associated hardware.

## **Executive Management**

C.J. (Jack) Pappas – CEO

Polar Research Laboratories, Virus Detection Systems, Ford Motor Company, General Electric

Gene Townsend – CFO

GT Financial, US Navy (retired), DoD, Naval Air Warfare Center Aircraft Division Patuxent River

Clovis Najm – Founder

Non-Elephant Encryption, IKON Office Solutions, Mecca Systems Inc.

Jon McAtee – VP Engineering

Leanne Pawluk – VP Communications

IBM, Adobe, ADP, US Naval Reserve, Palm Inc. Levi Strauss, iPlanet, Lipstream Networks, Eicon Networks

Richard Cannings – Chief Scientist

BBN Labs, WestJet, Inc., University of Calgary

Damien Norris – Software Architect

Non-Elephant Encryption, MightyOaks Wireless

## **Board of Advisors**

Shelley Lea Bennett (Executive Secretary)

United States Army, North Atlantic Treaty Organization, Joint Interagency Coordination Group for Counterterrorism

Hon. Richard Fairbanks

Ambassador-at-large for Ronald Reagan, Chief negotiator Middle East peace process, former President CSIS.
