# X°CELSIUS™

## Steal the Show.™

**Made to Persuade.** Award-winning Xcelsius takes you to a new level of presenting number-intensive reports such as financial results, business intelligence, and complex calculations. It is the first, and only, consumer product to marry point-and-click technology with interactive data visualization. Unlike other presentation software which allows you merely to "inform" your audience through static tables, charts and graphs, Xcelsius gives you the ability to "persuade" your audience through interactive and engaging data presentations.

With Xcelsius you will create:
- Executive dashboards and scorecards
- Dynamic charts and graphs
- Business reporting presentations
- Pro forma budget models
- Business and investment calculators

And with Xcelsius Professional Edition, you can link to live data using XML and Web services – for real-time reporting!

**Use Xcelsius to bring your data-presentations to life. You'll Steal the Show.™**

Develop dashboards and advanced real-time models using XML data sources. Developer license.

### Xcelsius Enterprise 3.5
Develop and deploy dashboards and real-time models across your corporate network. Developer & multi-user licenses.

---

**Engage your audience. Give deep insight into data. Make better, faster decisions.**

Xcelsius bridges the gap between data analysis and visual presentation by allowing you to display and interact with business data in ways that were previously unachievable. Utilizing an intuitive and easy-to-use "point-and-click" interface, Xcelsius converts dull Excel spreadsheets into dynamic presentations in 3 simple steps:

**1** — *Import* an existing Excel spreadsheet or XML data source.

**2** — *Create* an interactive data presentation with "point-and-click" Xcelsius.

**3** — *Output* your data presentation to PowerPoint, Outlook or the Web – with one click!

- Xcelsius enables you, and your viewers, to interact with the data and perform real-time "what-if" analyses by using animated charts and sliders that link back to the Excel formulas.

- For real-time reporting, Xcelsius Professional Edition allows you to link dashboards and presentations to live data using XML and Web services.

- Interactive Xcelsius data-presentations can be exported – with one click – to PowerPoint or Outlook. They can run on any PC, Mac, Tablet PC, handheld or other device with the Macromedia Flash player.

### Xcelsius Standard 3.0 Features:

- 42 robust components including 9 charts, optimized for dynamic simulations
- Flexible alert functionality for performance measurement
- One click export to Microsoft PowerPoint and Outlook
- Ability to import images as well as Macromedia Flash (.swf) files
- Quickly create alternative visuals to your reports with Global Styles

### Xcelsius Pro & Enterprise 3.5 Features:

*In addition to Standard Features*

- Save results of what-if analysis back to Excel or other XML enabled data sources
- Generate reports with live database connectivity
- Accommodate and display variable length XML records in your models
- Parameterized data display based upon user names and roles
- Trigger XML data update directly from Java script
