

IntegriCor delivers cost containment technology solutions for home and community based services.

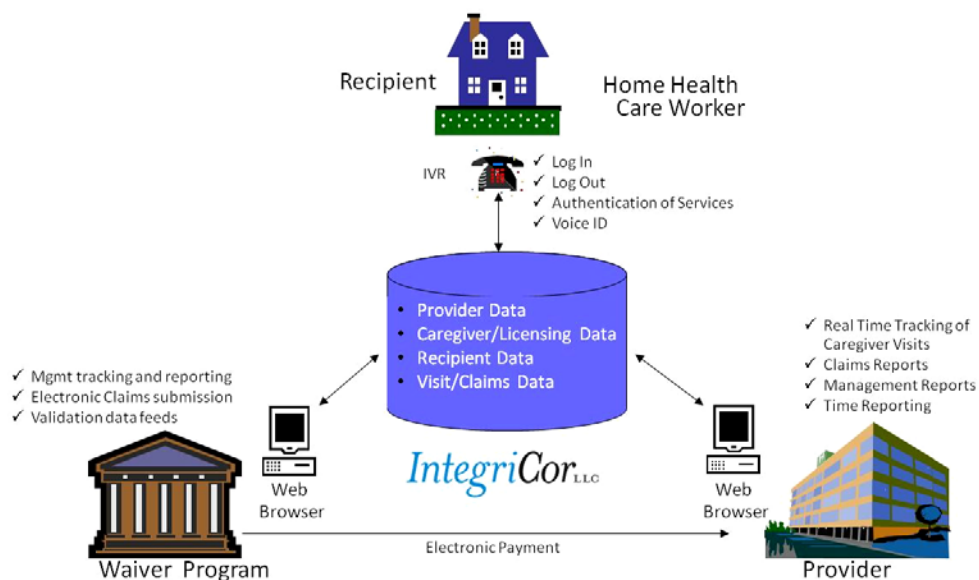

“Provides a verifiable means to assure the public that tax dollars are expended only for services delivered.”

Reduced the average number of reimbursed units and thus the average state expenditure per member per month.”

Oklahoma Dept. of Human Services
Office of Planning, Research &
Statistics

“Decreased direct cost by 23%...Decreased data entry time by up to 66%”

Rebecca Harvey, RN, CAN, BC
Director, Baptist Home Care
Oklahoma

- Web platform to manage home based care at a jurisdiction level, connecting necessary stakeholders through information delivery and integration.
- Automates and creates an electronic medical record.
- Monitors progress against plans of care, improves quality of care, collects valuable data, and promotes cost containment.
- Help beneficiaries stay in their homes, delaying and in some cases eliminating the need for higher cost institutional care.
- Integrated with ACS and EDS today.
- Market leader for State Medicaid agencies.
- Currently used in Advantage HCBS Waiver, State Plan Personal Care, and Consumer Directed Care.
