An 8(a) and MBE Certified
Small Minority
Business

About JIT Industries

JIT Industries is a female, Native American, disadvantaged and 8(a) certified small minority business. JIT designs, manufactures, repairs and services fluid power components for the steel, automotive, oil, aerospace, food processing, entertainment, power generation and forest product industries. Four complementary divisions enhance JIT's capabilities and streamline services in providing complete and cost-effective solutions for our customers. JIT is a company designed to keep manufacturing in America with the purpose of making our customers more profitable.

JIT Cylinders

JIT Cylinders has over 500 years of combined fluid power design and manufacturing experience. JIT begins every product design by asking for input from customers working in the field. By listening to actual customer needs, JIT provides cylinders that are designed "By Industry, For Industry". The combination of skilled employees coupled with state-of-the-art automated equipment results in a competitively priced, high-quality cylinder delivered on-time to customers worldwide.

Design and manufacture:

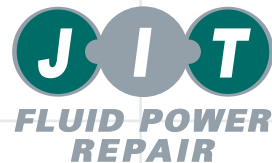

- Hydraulic Cylinders
- Electro-hydraulic Cylinders
- Pneumatic Cylinders
- Accumulators
- Pressure Intensifiers
- Manifolds

Cylinder Specifications:

- Maximum Bore Size = 65"
- Maximum Stroke Length = 1,000"
- Maximum Operating Pressure = 15,000 psi

365 Day Emergency Service

Critical Same Day Delivery Service

JIT Fluid Power Repair

JIT Fluid Power Repair provides reclamation service to all makes and models of cylinders, pumps, valves and other fluid power components. Coupled with cylinders, maintenance and industrial supplies, JIT is the largest and most comprehensive fluid power repair facility in the Southeast.

- Same day critical repair service
- 24-7-365 day emergency service
- Reverse engineering experience
- Failure analysis reports performed for all repairs
- Pick-up and delivery in 500 mile radius

JIT Industrial Supplies

JIT Industrial Supplies is a wholesale distributor of industrial maintenance, repair and operation replacement parts. JIT designs and builds custom power units and test stands. Customers and other JIT divisions are provided with many makes and models of fluid power components, delivered Just In Time.

Major product groups include:

- Bearings
- Fluid Power
- Pneumatic
- Mechanical Power Transmission
- Power Units and Test Stands
- Material Handling

JIT Maintenance

JIT Maintenance provides a full range of fluid power maintenance services on-site and on-call 24-hours a day to maximize operational uptime.

Common tasks include:

- Developing preventive and predictive maintenance plans
- Surveying all fluid power components to ensure maximum system effectiveness
- Purging and cleaning all power unit components and tanks
- Charging accumulators
- Repairing cylinders that are still on the machine
- Cleaning and maintaining valve stacks
- Eliminate hydraulic and pneumatic leaks
