

Peachtree
TELECOMMUNICATIONS

Integrator for the Wired and Wireless World™

- Full Service Communications and Security Integrator
- Fiber Optic and Wireless Infrastructure Specialists
- Certified Woman Owned Business
- State and Local DOT Certifications
- GSA Contract Holder

Peachtree Telecommunications International, LLC., is a nationally certified woman owned communications integrator providing infrastructure products and services for the deployment of digital video, audio, data, and security applications over fiber optic and wireless networks.

With headquarters and warehouse facilities in the Atlanta metro region, Peachtree serves clients in the telecommunications industry, government and transportation agencies, corporate and educational campuses, municipalities, and utilities.

Peachtree is a GSA contract holder. We are registered in most states as a vendor, and is certified by many state, county and local government agencies as a Department of Transportation (DOT), Disadvantaged Business Enterprise (DBE) and/or Women-Owned Business Enterprise (WBE). This enables our clients to fulfill diversity goals and requirements for projects at the federal, state and local levels.

Peachtree is a full service integrator offering:

Peachtree's team of in-house experts and network of partners represent a variety of markets and technologies and are on-hand to:

- Analyze your product and user application needs
- Provide systems integration and design recommendations
- Specify the right products and systems solutions to meet your needs

Peachtree sales engineers are skilled at sourcing from the primary and secondary telecommunications markets, working closely with manufacturers, engineers, contractors, distributors, and customers in order to find the right product for the job. Peachtree is a distributor for some of the largest manufacturers across the fiber optic, wireless, cable/wiring, and security industries. Peachtree's services include:

- Product sourcing
- Warehousing
- Distribution

Peachtree can manage your infrastructure implementation project from initial analysis through field installation. Peachtree's expertise spans multiple markets and technical fields. Our talented team of professionals provides innovative solutions to fit the distinct needs of our customers.

- Project planning and coordination
- Vendor coordination
- Field launch planning and coordination

At Peachtree we work closely with our network of installation partners to provide our customers with the best service possible. We are teamed with a variety of dedicated partners to provide the right level of expertise, regardless of the market or technology. Through benchmarking we are able to constantly improve our processes and provide best-in-class service and support.

- National network of partners
- Certified installers and technicians
- Project benchmarking

Peachtree specializes in:

Fiber Optic Networks

Peachtree is more than just a distributor of fiber test equipment and accessories, and cables designed to meet the widest range of application requirements. Our team of specialists have years of industry experience designing, building, and supporting fiber optic networks. We are able to provide customers with a deep understanding of the various fiber optic applications, configurations, and component requirements across the entire fiber optic fabric. We provide:

- Product and application analysis
- Network design recommendations
- Product and component specification
- Turnkey installation and fiber testing services

Wireless Networks

Peachtree is a full service integrator of turnkey WiFi, wireless LAN (WLAN), outdoor wireless WAN, cellular, satellite communications, and E-911 Location Services (see below for details). Peachtree offers a wide range of products for both inside plant and outside plant materials, including everything from access points and antennas to towers and shelters. Peachtree's network of specialists support a variety of services:

- Complete wireless path/spectrum analysis
- Network planning and system design
- Turnkey installation/de-installation, including towers and shelters
- Training and maintenance
- Wireless video systems

Digital CCTV & Security

Peachtree's security group specializes in custom digital CCTV, and advanced access control solutions for security, safety, and loss prevention. By combining expertise in fiber optic and wireless networks with cutting edge technology from the security industry, such as biometrics and intelligent behavior recognition systems, Peachtree provides its clients with unique solutions to challenging security applications:

- Mobile and wireless video for transportation, ports and waterways
- Industrial-grade systems for remote applications, such as utilities and construction sites
- Multi-site campus environments that require video and access data transmission over fiber and/or wireless IP networks

Investment Recovery

Peachtree offers a complete range of services to meet your investment recovery needs. We work closely with investment recovery officers, manufacturers, channel partners, and customers in order to keep a close eye on current trends in the marketplace. We evaluate market value of equipment that has either been taken out of service, is overstocked, or is new surplus due to a technological or brand change. This provides accurate and timely individual appraisal of each and allows our clients to maximize their investment.

- Rapid sourcing of warranted primary and secondary market inventories at competitive prices
- Asset disposition
- Asset valuation and appraisal
- Consignment programs

E-911 Location Services

The Federal Communications Commission (FCC) has issued a mandate requiring wireless carriers to provide Enhanced 911 (E-911) service — technology that automatically locates

wireless callers. Peachtree is one of a select few companies chosen to modify cell sites to meet these new FCC regulations. Peachtree can manage all aspects of the deployment process including:

- Public Safety Answering Point (PSAP) coverage mapping and analysis
- Data provisioning within existing landline E911 networks
- Data entry and maintenance
- Connection to the Position Determining Entity (PDE)

- System testing and certification
- Assistance with making changes to implementation plans filed with the FCC
- Coordination with the LEC for selective router provisioning

Peachtree supplies material from world class manufacturers such as ADC, Alcatel, AMP, Arnco, Avaya, Belden/CD, CISCO, CommScope, Duraline, Hitachi, New Basis, Norcom/CDT, Nortel, NOYES, OFS, Sumitomo and Valere Power, GE Security, Panasonic, Pelco, COHU, March Networks, Cernium, MAVIX, and Videolarm.

Financing is available through GE Capital and other sources. We accept Visa®, MasterCard®, and American Express®.
