Vision and Mission

*From Radha Jalan
President and CEO*

ElectroChem is the perfect partner for a company who is serious about hydrogen energy / fuel cell research

For nearly two decades ElectroChem has been the enabling agent empowering companies and research facilities worldwide to move forward in regards to hydrogen power

ElectroChem is not only an industry leader.....but an industry partner

“ElectroChem envisions a future where a sustainable global economy resides in harmony with a clean, healthful environment”

For twenty years, ElectroChem has pursued its vision of a world fueled by clean energy.

Today ElectroChem leads this dream, not just through its own R&D efforts to advance fuel cell technology, but as a recognized and respected partner to the industry. ElectroChem is proud that it provides the highest quality components, systems and service to its global customer base.

In its mission to advance fuel cells as a viable alternative energy solution, ElectroChem is committed in its goal in educating and supporting the public and the industry. Whether it's speaking at universities around the world, or meeting with small citizen groups who desire to understand the options that are available, ElectroChem will drive the concepts from drawing board to reality

Regards,

Dr. Radha S. Jalan

A BRIEF HISTORY

1992—FIRST to develop and market a portable fuel cell system

1993—FIRST to develop computerized test equipment

1995—FIRST fuel cell company to be online

1999—Acquired GlobeTech to increase product line

2001—Awarded contract with NASA for the next generation RLV

2002—FIRST to develop a FIVE independent cell test station
