

VISION Engravers & Routers

are now

FASTER Than Ever!

The New VE-810 and VE-810 XD

The popular VE-810 now comes with a proximity sensor for automatic surface setting, making job set-up much easier! Also, this affordable, compact machine sports a friendlier new front panel for enhanced usability. The XD model has a removable T-slot table and is equipped with a self-centering vise which allows the user to engrave items up to 3 1/4" deep. The Vision Engraving Software is pre-programmed with the center/center position,

assuring precision placement of your text and logos. In addition to flat gift items like inscription plates, photo frames and cutout shapes, this unit is ideal for engraving medallions, key chains, hip flasks, cubes, gift boxes, jewelry, lighters and many other items made from metal, acrylic, brass, wood, or plastic.

MAX

This is Vision's MULTI-AXIS engraving system, featuring diamond drag or rotary engraving. With this heavy-duty system, you can engrave cylindrical items up to 10 inches in diameter at any angle and you can also engrave flat items with the interchangeable t-slot table. This unit is suitable for engraving both trophy and gift products, as well as many industrial items.

Phoenix 1212

A friendly system for both the professional engraver and new users alike. The t-slot table can be replaced with an optional deep vise for engraving objects up to 3" thick. Product applications for the Phoenix 1212 include trophies, awards, gift items, signage, plaques, badges, name plates, and much more.

The Vision 1612 & 1624 Engravers

The 1612 and 1624 are ideal for heavy-duty applications in a medium-size engraving area. In addition to trophies, plaques and gift items, their extremely rigid design allows these tables to be used for a variety of applications such as notary seals, tool & die work, deep metal cutting or engraving and ADA compliant signage.

The Vision 2424 & 2448 Engravers

The 2424 and 2448 are ideal for heavy-duty applications in a large engraving area. Great for a variety of jobs such as volume production work, large signage, industrial marking and multiple plate jobs. With the ability to engrave an entire sheet of engravers' plastic, the Vision 2448 is the ultimate productivity tool for your shop.

Vision 2424 & 2448 Routers

The perfect tool for Routing out wood signs and particle board masters, inlays, control panels, cutting into wood, Plexiglas®, acrylics, aluminum or brass, Braille to meet ADA regulations, architectural signage, electrical signage, stencil-cut letters, creating designs in wood cabinets and furniture, foam signage and cut-out letters, 3D Geometric designs and much more!

NEW HIGH SPEED VISION CONTROLLER

With engraving speeds of up to 10 inches per seconds, the New Series 3 Controller will increase your productivity significantly! The controller has many other new state of the art features including a high speed network connection to the PC, job timers, multiple programmable offsets, advanced diagnostics and the ability to run saved jobs directly from the hard drive on your computer. An optional pendant is also available. This Series 3 controller is fully 3D capable and runs from most industry standard programs such as CorelDRAW®, Vision®, Vision Pro®, SignLAB®, EngraveLAB®, Casmate®, Enroute®, Type3® and more! Included with the Phoenix 1212 and larger Vision systems, this new controller is retrofitable to most other manufacturers' engraving tables.

Runs directly from
Corel Draw!

Accessories

HIGH FREQUENCY SPINDLE

With increased torque, this beltless, direct-drive, 40,000 RPM spindle is ideal for production metal engraving. Comes with a digital RPM readout.

UNIVERSAL PIN FIXTURES

Available for the Versa Vise, T-slot table and Self-Centering Vise. Also usable with other computerized engravers and Pantographs. This fixture enables engraving on all unique sized pens, lighters, knives, keychains, and many other irregular shaped items.

MULTI MAT

Multi Mat completely eliminates the need for double stick tape, clamps, vacuum tables and most other hold down methods on many engravable items. Just press it into place on any size engraving table and you're ready to go. Made with a special rubber coating on both sides, for easy cleaning and extended use.

UNIVERSAL CLAMPING BARS

This clamp set allows you to engrave right up to the edge of the material. It can also adapt to Pantographs as well as other computerized systems. Designed to hold either 1/16", 1/8" (or thicker) material. Fits all T-slot tables.

ROTARY ATTACHMENT

With the Vision Rotary Attachment, you can engrave around the entire circumference of items up to 1.5"! This handy accessory is compatible with any Vision Engraving System that has the Series II Vision Serial Controller. It can hold items up to 7" in length.

QUICK LOCK VISE

The Quick Lock Vise is designed for T-Slot table users. Its "cam" type locking device allows for quick changing of parts. This vise is supplied with a removable front clamping plate which allows for holding thicker items. Fits all T-slot tables.
