Call RSS Technologies today for a FREE network consultation. Call 330-204-1742. Ask how you can reduce your IT budget and still get an enterprise-class network infrastructure at a fraction of the price.

Nitix™ - Unique Technologies

NetIntelligence

- Artificial intelligence technology performs network discovery and mapping, ongoing configurations, operating system maintenance and auto-configuration of the firewall.

SystemER

- Advanced disaster recovery technology that enables Nitix-powered servers to recover from any type of system failure (faulty hardware, fire, flood, theft) into a fully functional state in two minutes.

idb - Intelligent Disk Backup

- Continuous, automated, unattended backups as often as every 15 minutes, and automatic backup management.

DoubleVision

- High reliability redundant Internet connectivity system.

TunnelVision

- Fast, secure and simple VPN set-up, with zero-maintenance.

Software RAID Technology

- Supports RAID 1 (mirroring) or RAID 5 (multi-disk array) with idb backup for increased data storage capacity and additional data protection.

Nitix-Powered Net Integrator Servers

Net Integrator Micro

Powered by Nitix, Micro is an integrated, reliable server that supports the latest Internet and intranet technologies, as well as traditional file services. Micro offers businesses a simple and affordable way to connect branch offices or remote office workers quickly and securely.

Net Integrator Mark II

A Nitix-powered Mark II server delivers an exceptional combination of reliability, security and flexibility for small to medium-sized enterprises that need unprecedented levels of performance. Nitix's unique features make the Mark II extremely easy to deploy, service and remotely manage, helping to lower total cost of ownership.

Net Integrator Mark I

Mark I is a reliable server that offers superb performance. A Nitix-powered Mark I server gives small to medium-sized businesses the power and flexibility of traditional servers, with advanced features such as disaster recovery and secure data storage. The Mark I is ideal for small to medium-sized businesses, branch offices and departments, and educational organizations..

Net Integrator Mark IIIR

A robust and powerful 2U-rackmount solution, the Mark IIIR provides the highest storage capability and performance of its class, with dual processors and up to six SCSI-based, hot swappable hard drives. A Nitix-powered Mark IIIR server gives businesses performance and data protection at an affordable price.
