GovWorks Federal Acquisition Center Contract No. 1435-4-02-RC-86127

ManageRight® provides Telecom Expense Management (TEM) solutions required in managing the financial and technical aspects of Voice, Data, and Wireless services infrastructure. ManageRight is a web-based solution that offers industry-best practices to enable telecom managers to automate tasks, streamline internal workflow processes and make informed decisions, using timely alerts.

*Centralize Inventory • Control Spending • Improve Efficiencies*

The ManageRight® Wireless portal helps businesses control their wireless expenses through management. ManageRight Wireless supports policy development and enforcement, plan and device comparisons, procurement, asset management, invoice processing, expense allocation, and plan usage alerts. This unparalleled solution significantly reduces expenses and streamlines operational workflow.

*Eliminate Wasteful Spending • Flawless Integration*

## Professional Services

Our Professional Services enable businesses to utilize a team of analysts and innovative technology to quickly complete special projects and augment staff needs. Whether supplementing the ManageRight solution, redesigning networks, taking inventories, or meeting specific requirements, we can customize our services to achieve your goals.

*Dedicated Team • Rapid Results*

## BrightCare™

BrightCare™ monitors telecom assets and expenses in real-time. Alerts are sent when critical business decisions are required. This is the first proactive telecom care system. With BrightCare you have an additional team member to watch out for your business 24 hours a day.

*Proactive Advice • In Real-Time*

## About Us

Developing superior solutions with analysis and software since 1988, TeleBright and IntelliSales have been pioneers in the telecom industry. With IntelliSales software for the telco sales teams and TeleBright management solutions for businesses and government, we deliver an excellent service experience.
