Fleetguard

Located in Indianapolis, IN, Founded in 2004 by Frank Codozor and located in Indianapolis, Worldwide Filters is a leading distributor of all types of filtration products – HVAC, water, oil, hydraulic, paint booth, dust collectors, non-woven's and HEPA – just to name a few. Additionally, Worldwide Filters offers surveys of usage, engineering advice, and air quality testing.

Worldwide Filters can undertake complete commodity management and can work with a business to organize that company's filter needs. Through centralized sourcing and inventory management, we help you realize greater efficiencies and cost savings. Our customers have been able to achieve dramatic benefits by centrally controlling cost, quality and delivery of their entire suite of filtration purchases.

Unlike direct manufacturers and exclusive distribution chains, Worldwide Filters is not driven by its direct supply chain to provide a specific line of products. Instead, we are an independent distributor who provides customized filtration solutions tailored to our customers' needs.
